RASHEED AYOBAMIJI

Land Surveyor

0810-481-4132 rayobamiji@gmail.com https://www.linkedin.com/in/rasheed-ayobamiji-

PROFESSIONAL SUMMARY

Experienced Land Survey Professional with over five years of expertise in construction, topographical, and land development surveying**,** including roads, residential estates, industrial buildings, and large-scale infrastructure projects. Proficient in AutoCAD Civil 3D, GIS, RTK GPS, and Total Station operations. Skilled in setting out, topographical surveys, and as-built documentation. Registered Pupil Surveyor with SURCON and Associate Member of NIS, with strong expertise in QA/QC, engineering data processing, and precision-driven survey operations.

TECHNICAL PROFICIENCY

Equipment: Total station, RTK GPS/GNSS, Level, Drones / UAV

Software: AutoCAD Civil / Map 3D, GIS Tools, Global Mapper, Surfer, LiContour, SiteSurvey, MS Suites

Core Competence: Construction Setting Out, land survey, Topographical and Perimeter Survey, As-built Survey, Benchmark controls & Alignment, QA/QC, Engineering drawing Interpretation, Environmental Survey

PROFESSIONALEXPERIENCE

Oak Surveys Ltd, Lagos

Associate Surveyor | Team Lead December 2023- Present

- Lead survey operations for construction and infrastructure projects, including residential estates, industrial buildings, and civil works.
- Execute high-precision survey layout, construction setting-out, and as-built verification using RTK GPS, Total Station, and digital levels.
- Establish and maintain geodetic control networks (1st & 2nd order) to support civil engineering and construction alignment.
- Process and validate survey datasets using AutoCAD Civil 3D, Map3D, and GIS tools to produce topographic and engineering plans.
- Review, certify, and sign off survey reports and as-built documentation to ensure compliance with client specifications, QA/QC, HSE and SURCON standards.
- Coordinate directly with engineers, contractors, and clients to ensure accurate and timely survey deliverables.

Pupil Surveyor | Team Coordinator May 2021 - December 2023

- Managed land survey teams for pipeline, housing, and industrial projects, ensuring field data accuracy and construction layout precision.
- Assisted in establishing survey control points, performing alignment verification, and preparing engineering deliverables.
- Supported topographical and hydrographic surveys to produce accurate maps, plans, and as-built documentation.

Geocadinal (GISL) P/H Rivers State

Graduate Surveyor -Seismic Operations) March 2020- August 2021

- Supported 3D seismic survey operation and ROW Pipeline Mapping
- Established 1st and 2nd Order geodetic control networks for pipeline corridor surveys

- Assisted in alignment verification and reporting for pipeline construction projects

SELECTED LAND SURVEY AND CONSTRUCTION PROJECT

Proposed Housing Development – Dayspring Property Development Company **(Commercial)**

- Conducted topographical, perimeter, and environmental surveys to guide site planning and civil works.
- Provided survey support for construction of high-rise building, setting-out of pile points, foundation, level verification for M&E works, optimizing the entire construction scope

Royal Garden Estate Layout Setting-Out – Trojan Property Limited **(Real Estate)**

- Executed construction layout, including roads, plot boundaries, and utility alignment for residential estate.
- Conducted topographical survey of the estate for layout approval and environmental impact assessment
- Established benchmarks and performed survey measurement for utility alignment, road works and grading, construction of storm drain and canal for the estate

Nestle Flower gate Factory – As-Built Verification – **(Industrial &Manufacturing)**

- Conducted boundary demarcation survey, detail and topographical survey for engineering design and civil works.
- Established benchmarks to calibrate engineering work flow, and ensure accuracy across the project
- Performed dimensional control and height verification for completed structures to confirm compliance with engineering drawings.

Fifth Chukker Polo Club – Land & Topographical Survey (2000 Hectares) (Recreation & Hospitality)

- Conducted large-scale topographical and as-built surveys for site planning and civil works.
- Established benchmarks to support construction operation.
- Executed setting-out of Polo fields, chalets, and ponies, vertical alignment and grading of the field to match specification and standards. As-built Survey of civil structures and infrastructure to meetup with engineering accuracy

Survey works for road construction – **Cappa & D'Alberto Construction Company**

- Executed land, topographical, and environmental surveys to support engineering and construction planning.
- Established benchmarks for road, drains, culvert and bridge construction.
- Carried out route survey, setting-out of right-of-way, alignment chainage, curves, and grading/level for road, drainage, culverts and bridge installation

EDUCATION AND QUALIFICATION

Bachelor of Technology (B.Tech) in Surveying and Geo-informatics

Federal University of Technology, Akure

Second Class Upper Division

PROFESSIONAL AFFILIATION

- Registered Pupil Surveyor-Surveyor Registration Council of Nigeria (SURCON)
- Associate Member, Nigeria Institution of Surveyors (NIS)
